-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 15 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 15, the term "accommodated" is considered indefinite, because the structure of the furniture is not positively claimed.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,4,5,8,9,10 & 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Korean Patent Application 1999-012383. The Korean application discloses a refrigerator comprising: a refrigerator machine room with a cover hermetically in contact with surrounding area of an air outlet, a compressor (20), a condenser (30) with a fan/impeller with motor (see figure) situated in between of said condenser and an outlet air cover.

Claim 15, as best understood is rejected under 35 U.S.C. 102(b) as being anticipated by Japanese Patent Application 200-274915. The Japanese Patent

Art Unit: 3744

Application disclose a refrigerator comprising: a upper and lower air vents, a fan, a condenser and a compressor and inherently maybe situated within a kitchen cabinet.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2,3,11,12 & 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Korean Patent Application (KR 1999-012383) in view of "Official Notice". The Korean Patent discloses the claimed invention as stated above however lacks to mention air guiding parts provided at outlet that are sloped up & downwardly. Examiner takes "Official Notices" since it is well know in air conditioning and refrigeration art to provide a plurality of air guides either sloped up or downwardly. Therefore it would have been obvious for one of ordinary skill in the art at time invention was made to provide said means of air guiding parts at outlets for the mere purpose of efficiently directly discharged/expel air away from the rear outlet cover.

Allowable Subject Matter

Claims 6 &7 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Art Unit: 3744
